

UC Irvine Adult ADHD STUDY

Do you experience any of the following?

- trouble concentrating
- easily distracted
- restless and difficulty sitting still
- leaving tasks unfinished

If so, you may be an adult with Attention-Deficit/Hyperactivity Disorder (ADHD).

The University of California at Irvine is conducting a new study for adults with ADHD. This study will offer study related assessments for ADHD and study drug, at no cost to you.

If you are a healthy male between the ages of 18 and 64 years, you may qualify for participation in this research study. Current drug abuse may exclude you from participating in this study. This research study will test the efficacy and safety of an investigational drug to treat ADHD.

If you or someone you know is interested in this study please call:
